

Mock-up Meeting Notes (11/09/23)

Good use of **colors** and **imagery**, but the home page can be more interactive.

Better **navigation**: make the navigation more direct so that users can go back and forth different tabs easily. Maybe add a left arrow (backspace) button next to the right arrow, or make buttons with the title of each tab directly.

Avoid using long paragraphs. Make it more **straightforward** and easy to digest using images and interactive elements.

- i.e. Make the individual achievement into an image of a trophy? in the receptions tab. Maybe the whole tab could be a "trophy shelf" and each achievement can be laid out on the "shelf." Specific information could be accessed when the user hovers over the trophy.

Add more fun, interactive elements in general!
